Experience

- **Hilabs** Bangalore
  AI Engineer *December 2025 - Present*
  - Leading the Provider-Directory team as an acting EM and architect.
  - Creating the general workflow of contextual layer over **3+ terabytes** of durable provider data
  - **Tech Stack**:- AWS, Docker, Angular, Node.JS, GO, Python, OpenAI, ECS, NoSQL-(MongoDB)
- **Quizizz** Bangalore
  Full Stack Developer (BE Heavy) *November 2024 - September 2025*
  - Leading the Lessons and Content team back-end as an IC.
  - Revamped authentication flow to implement end-to-end storage of reusable refresh tokens, enhancing session reliability and security for **300K+ DAU** across U.S. school platforms.
  - Developed and deployed content import flow supporting platforms like **Google Drive** and **OneDrive**, streamlining ingestion of slides and presentations and reducing manual content handling overhead.
  - Implemented AI-driven parameterized quiz generation across multiple **quiz types and languages**, reducing user interaction steps by **40%** from content upload to game hosting, improving speed to classroom engagement.
  - **Tech Stack**:- AWS, Docker, Angular, Node.JS, GO, Python, OpenAI, ECS, NoSQL-(MongoDB)
- **PhotonInsights** Remote
  Software Architect - Full time *August 2022 - October 2024*
  - Lead a backend and infrastructure team of **4 team members**, driving the development of scalable systems.
  - Generated **Level 1 diligence reports** for asset management financial institutions, providing critical insights for investment decisions, developed historical sentiment analysis by scraping **SEC filings** and **earnings call data**, enhancing market research capabilities.
  - Enabled document insights with specific annotations for university PhD students, facilitating quick research and generating at least **2-3 new annotations** per project.
  - Integrated Microsoft OpenAI LLM, prompt engineering, and vector databases, optimizing query responses with embeddings and reranked summaries, reducing query time from minutes to **less than 5 seconds**.
  - **Tech Stack**:- AWS, Docker, React, Python, OpenAI, ECS, Scala, Java, SQL-(MYSQL, Postgres), NoSQL-(MongoDB)
- **Goldman Sachs** Bangalore
  Analyst - Global Markets Division - Full time *August 2020 - August 2022*
  - Lead the design and implementation of migrating legacy monolith code base to micro-service architecture with unit test cases and continuous deployment with 2 team members.
  - Solving business problems such as avoiding **duplicate trades data** in database, rebates and commission charges based on the daily average trade, implementing and designing test scripts such as JUnit and fitnesse.
  - **Tech Stack**:- Java, SQL-(MYSQL, Postgres)
- **Zilingo** Bangalore
  SDE-II - Full time *July 2019 - July 2020*
  - Writing core libraries, such as: Pagination in UI interfaces, password authentication across all login micro-services in Zilingo.
  - Designed, developed and owned the complete B2B invoice tool.
  - **Tech Stack**:- Java, Scala, SQL-(MYSQL, Postgres)

Education

- **Indian Institute of Technology, Roorkee** Roorkee
  B.Tech; GPA: 8.15/10 (Absolute) *July 2015 - April 2019*

License & Certifications

- **Cybersecurity** MIT master class, Security+, CEH v11, Network+

Leadership Experience & Accomplishments

- **Heritage Student** - IITR Heritage Annual Excellence Award, 2016, 2017 & 2018.
- **Secretary & Joint Secretary** - Table Tennis Club, IIT Roorkee, Jun 2017 - May 2019.
